Jakarta

As a dedicated and versatile full-stack developer, I excel in creating innovative and user-friendly web applications. My solid foundation in front-end technologies such as HTML, CSS, and JavaScript, combined with expertise in back-end frameworks like NestJS and PostgreSQL, enables me to deliver comprehensive end-to-end solutions. Proficient in modern front-end frameworks like Next.js, I seamlessly integrate different components to build robust and scalable applications. Highly motivated and detail-oriented, I am committed to delivering high-quality code that aligns with client requirements and industry best practices.

Work Experiences

Self Employed Freelancer - Jakarta

Jan 2024 - Present

While waiting for interview calls, I have been working as a freelancer on various web development platforms.

- E-commerce Application: Built a full-stack e-commerce platform using Next.js for the front-end and Nest.js for the back-end. Integrated PostgreSQL for data storage, tested using postman and implemented user authentication with JWT. Deployed the application on Vercel.
- Personal Portfolio: developed personal portfolio using react.js for the front end
- Overall, my freelancing experience has not only benefited clients by delivering robust and user-friendly web solutions but has also played a significant role in my professional growth. Through various projects, I have enhanced both technical and soft skills such as time management, client communication, and problem-solving.
- This journey has strengthened my confidence in working with modern web technologies and prepared me for more advanced opportunities in the web development industry.

PT Tani Prima Makmur - Jakarta
